

Saskatchewan Energy and Resources: PRIME'd for the Future

*Jeff Ritter*¹

*Oil and gas is big business in Saskatchewan. That's why the province's Ministry of Energy and Resources is making investments in its business processes and information systems. In his presentation, **PRIME'd for the Future**, Jeff Ritter will discuss how the Ministry's Process Renewal and Infrastructure Management Enhancement (PRIME) project will revitalize, modernize and automate the processes the industry must complete to meet their legislative, regulatory and royalty commitments to the province. During his session, Jeff will cover:*

- *What is PRIME, its scope, why it's needed and the benefits it will provide the Ministry and industry*
- *Saskatchewan's full and equal partnership in the Petroleum Registry of Alberta*
- *How PRIME will streamline legislative, regulatory and reporting processes*
-

¹Saskatchewan Energy and Resources

Jeff Ritter is director of PRIME, Saskatchewan's Ministry of Energy and Resources' Process Renewal and Infrastructure Management Enhancement project. The multi-year, multi-million dollar project will review and renew the Ministry's oil and gas-related business processes and supporting technology. Ritter, who holds a Masters in Business Administration, has 15 years experience as a senior manager in the government of Saskatchewan. Before undertaking PRIME, he was the Director of Planning and Evaluation at Saskatchewan Energy and Resources where he developed and implemented a framework for business process improvement and program review.
